

BRD - EpicMinds Contact Us Page Improvement

Project: Personal Portfolio Project - QA & Business Analysis (Case Study on EpicMinds Website - Taken as Example)

Prepared By: Lavanya R

Date: 06-Oct-2026

1. Objective

This project is my personal QA & BA portfolio work where I have taken EpicMinds website as a sample website for audit purpose.

2. Current Problem

- No email validation in Contact Form
- No success message after form submission
- Mobile view breaks on 320px-768px
- Footer social links open in same tab (user leaves site)
- No spam protection (no CAPTCHA)

3. Proposed Solution

- Add email format validation + error message
- Show "Thank You" toast after successful submission
- Make form mobile responsive
- Social links should open in new tab (target="_blank")
- Add CAPTCHA and WhatsApp quick contact button

4. Stakeholders

- Business Team (Lead Generation)
- Development Team (Frontend)
- QA Team (Testing)
- End Users / Students

5. Scope

In Scope: Contact Form, Validation, Mobile Responsiveness, Success Message, Social Links

Out of Scope: Payment Integration, Backend API Rewrite

6. Functional Requirements

- FR01: System shall validate email format (regex check)
- FR02: System shall display "Thank you for contacting us" message after submit
- FR03: Form shall be responsive on mobile (320px to 768px)
- FR04: Social icons shall open in new tab
- FR05: System shall show CAPTCHA before submit

7. Non-Functional Requirements

- NFR01: Page load time < 2 seconds
- NFR02: Compatible with Chrome, Firefox, Edge, Mobile browsers
- NFR03: Security - prevent SQL injection in form

8. Timeline

- Requirement Gathering: 1 Day
- Design: 1 Day
- Development: 3 Days
- QA Testing: 1 Day
- Total: 6 Days

9. Success Metrics (KPIs)

- Lead Conversion +30%
- High Severity Bugs = 0
- Form Submission Success Rate > 95%

10. Risks

- Validation may break old data
- Mitigation: Test with 15 test cases covering invalid emails

11. Approval

Business Analyst: Lavanya R

QA Lead: Lavanya R

Status: Approved
